

Cannulated *Fusion* Screws

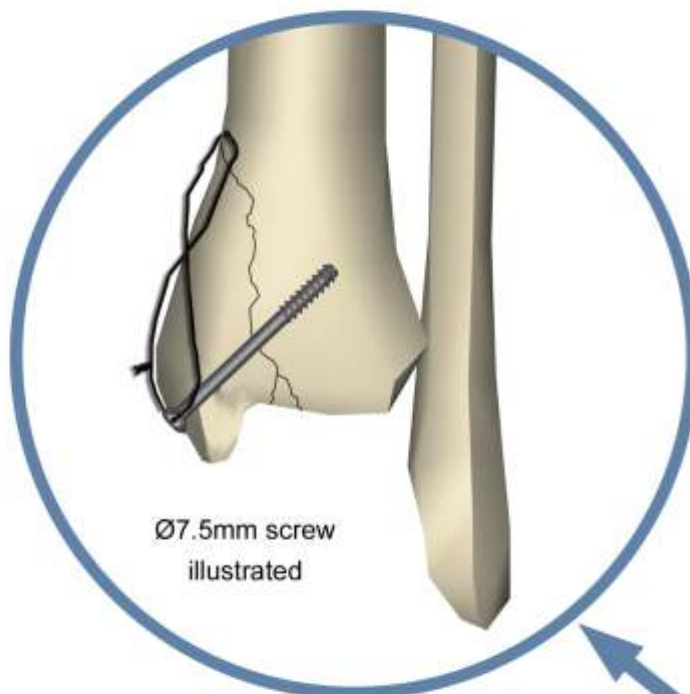

With Wire Lock Heads

Self-tapping cannulated screws available in 6 diameters:

- 3.0mm
- 3.5mm
- 4.0mm
- 4.5mm
- 6.5mm
- 7.5mm

Lengths available range from 10mm -80mm in 2mm increments.

Intraoperatively the screwhead offers greater fixation and fragment security using wire to further stabilise the construct. This also prevents the screw from backing out.
